

## Stephon Hendrix Louis

The fifth child of Marie Michael was one among the babies named in the record books. She delivered a baby weighing 14 pounds and 13 ounces in the season 2011. Back officials told that he had broken the 18 years biggest baby record ever born at William W.Backus hospital. He was also measured 23 inches long. He did not surprise his mother since his eldest brother and twin brothers were also born with heavy weights.

Even though it seems to become a weird one she made the country's largest baby ever. Her mother was found suffered from undiagnosed gestational diabetes that typically occurs around 24th week in pregnancy.
