

HZS Series stationary [concrete mixing plant](#) is developed by SINOSUN.

HZS Series [stationary concrete mixing plant](#) is suitable for the commodity concrete and concrete construction in each kind of architectural project, including water conservancy, electric power, railroad, tunnel, arch of bridge, harbor-wharf and national defense project, etc. The application scope is widely spread.

HZS Series stationary concrete mixing plant can mix hard concrete, plastic concrete, liquid concrete, and other various lightweight aggregate concrete.

HZS50 stationary concrete mixing plant has the capacity of 50m<sup>3</sup>/h, adopts SM1000 Twin Shaft Concrete Mixer. The aggregate loading type is skip hoist hopper.

The [concrete batching plant](#) and mixing plants produced by our company have involved many national key projects, such as highway construction, port construction. Our concrete batch and [concrete mixing plant](#) are not popular at home but also export to all over the world. Our plants have been exported to Phillipine, Mozambique, Burma, Togo, Peru, Oman, etc. We can also design concrete plants according to your individual requirements on the base of our highest quality standards. We would like to be helpful in your future business success. Besides the reliable control technology, we supply a full line of spare parts, such as [concrete mixer](#), cement silo. Construction efficiency and safety are our primary objectives. All our spare parts are produced on the same production line and to the same tolerances as the original parts. Our spare parts could guarantee the highest performance of your concrete batch & mixing plant. We also commit to turnkey solutions and diversified service to ensure total customer satisfaction. Our mobile concrete plants include modular mobile concrete mixing plant and hauling [mobile concrete mixing plant](#).

**Advantages of [mobile concrete mixing plant](#):**

1. Our mobile concrete mixing plants require less installation area required due to its compact design. Our mobile batching plant is popular for its quick and easy installation and operation in- 2-3 days to start concrete production and one day for disassembling.
2. Our [mobile concrete plant](#) gives you the advantage of direct feeding of mixed material into transit mixer or concrete pump. With our mobile concrete mixing plant, the concrete transportation cost can be minimized.

This series of mobile concrete mixing plant is the ideal choice for projects that require frequent movement from one construction site to another.

[YHAS35 Mobile Concrete Mixing Plant](#) adopts twin-shaft compulsory mixer, folding three-hopper burden machine.

Its characteristics are unique car chassis design, multi-language Windows operating interface, electricity gas water Express plug, a high degree of automation, disassembly and convenient mobility.

SINOSUN Group is one of China's dominant [concrete mixing plant manufacturer](#) and exporters. [concrete batching plant](#) and [concrete mixer](#) are our specialty.

Our [concrete mixing plant](#) is not popular at home but also export to all over the world. Our plants have been exported to Phillipine, Mozambique, Burma, Togo, Peru, Oman, etc.

Our mobile concrete plants include modular mobile concrete mixing plant and hauling [mobile concrete mixing plant](#) .

We can also design concrete plants according to your individual requirements on the base of our highest quality standards. We would like to be helpful in your future business success.

Our [concrete mixers](#) include planetary concrete mixer and twin-shaft concrete mixer.[Planetary Concrete Mixers](#) not only applies to produce common commercial concrete and precast concrete but also have solved many problems about High Performance Concrete mixing.

[Twin-shaft concrete mixer](#) has strong mixing capacity, the mixing effect is especially good for dry-and-hard, half of the dry-and-hard, plastic and each of the allocated proportion concrete.

China [concrete mixing plant manufacturer](#) and supplier.We offer [concrete batching plant](#) , [concrete mixing plant](#) and [concrete mixer](#) .

Our [mobile concrete mixing plant](#) include modular mobile concrete mixing plant and hauling mobile concrete mixing plant.

.....

SINOSUN Group is one of China's dominant [water well drill rig manufacture](#) and exporters. [Water well drilling rig](#) and drilling rig components are our specialty. We supply precised whole water well drilling rigs at very competitive prices.

Our [water well drilling rigs for sale](#) are widely used in domestic water conservancy, mining and other systems and also exported to Southeast Asia, Africa and South America.

We supply a full line of drilling rig packages: [truck water well drilling rigs](#) , [trailer water well drilling rigs](#) and [Small water well drilling rig](#) . We also supply air compressor, drill hammer, dill rod and drill bits for immediate shipment.

The [concrete batching plant](#) and mixing plants produced by our company have involved many national key projects, such as highway construction, port construction.

Our concrete batch and [concrete mixing plant](#) are not popular at home but also export to all over the world.

Besides the reliable control technology, we supply a full line of spare parts, such as [concrete mixer](#) , cement silo.

We also commit to turnkey solutions and diversified service to ensure total customer satisfaction. Our mobile concrete plants

include modular mobile concrete mixing plant and hauling
